

Micro-fabrication Line

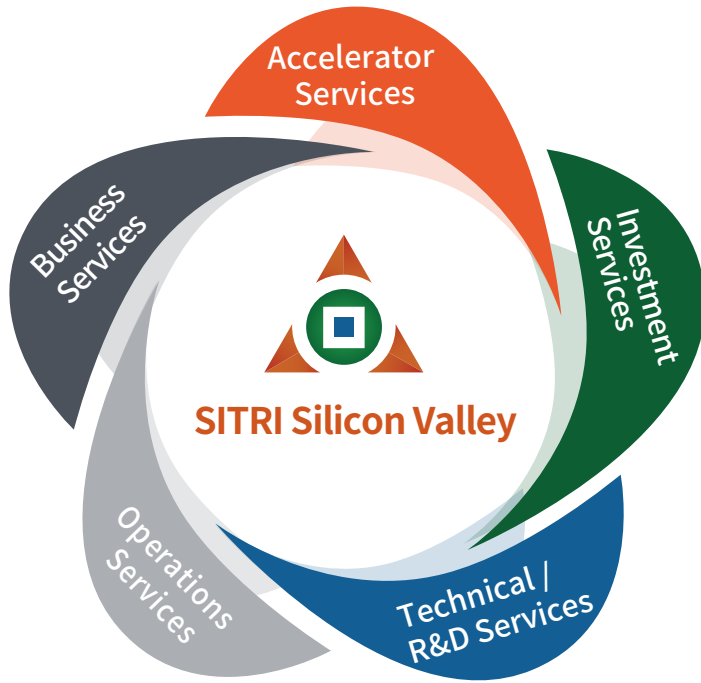

SITRI's 8" "More than Moore" R&D fab is designed to support the development and integration of new processes, materials and structures. Using this in-house facility and SITRI's foundry partner network, we can provide the complete needs of our customers, from initial integration to commercial volume requirements.

Engineering Labs

SITRI has a wide range of on-site test and verification equipment that allow us to offer reverse analysis services. With this ability, SITRI has turned what has traditionally been time-consuming experimental research into an efficient commercial service. Our experienced technical team has deep expertise in IoT-related disciplines.

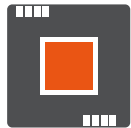

SITRI Silicon Valley

About SITRI Silicon Valley

SITRI Silicon Valley brings the engineering services, account management, industry partnership, investment and incubation activities of SITRI to the Bay Area. Supporting global innovation through local expertise, SITRI Silicon Valley not only supports local companies in technology incubation and development, but also brings the rich expertise and ecosystem of Silicon Valley to SITRI clients and partners worldwide.
